ANTS CAREER ZONE:
An opportunity for both employers and job seekers that facilitates face-to-face interaction, research discussion, on-site interviews, and much more while saving time and cost. The employers will have access to a number of resumes and the candidates will have an opportunity to explore various available positions from different organizations.

Sponsorship:
To sustain the quality of IEEE ANTS that the ANTS community and the IEEE communication society have been able to establish thus far, we greatly depend on financial support from reputed organizations. IEEE ANTS provide sponsors an opportunity to showcase their organization's capabilities to researchers and engineers from all over the world. In the past, IEEE ANTS has been co-sponsored by different organizations such as Cisco, Qualcomm, Samsung, Infinera, Microsoft, Keysight, Mathworks, DRDO, CSIR, SERB, UKIERI, C-DOT, Tejas Networks, Wipro, Ennetix, IEEE Future Networks, and others. Sponsorship proposals are invited for IEEE ANTS 2023.

IEEE ANTS is a premier IEEE conference on advanced networking and telecommunications topics. IEEE ANTS is financially and technically supported by the IEEE Communications Society. The distinguishing characteristic of IEEE ANTS is the promotion of an intense dialogue between academic and industry to bridge the gap between academic research, industry initiatives, and governmental policies. This is fostered through panel discussions, keynotes, invited talks, and industry exhibits, where academia is exposed to state-of-the-practice and results from trials and interoperability experiments. The industry, in turn, benefits from exposure to leading-edge research as well as an opportunity to communicate and collaborate with academic researchers regarding practical problems. This year the theme is **Ubiquitous networking for seamless connectivity**. Technical papers are invited which have special focus on enabling technologies that are aligned with the theme of the conference. IEEE ANTS 2023 will held at Malaviya National Institute of Technology, Jaipur, India. This year all the presentations will be conducted in-person at MNIT, Jaipur. The theme of the conference will foster an environment for deliberating on different research aspects on the said topic. Authors can submit short (max 4 pages) and regular (max 6 pages) papers that contain original material which is not currently communicated/submitted/under-review in other conference or journal and has not been previously published. Potential research topics include (but not limited to) the following thrust areas.

After review, all accepted and presented papers will appear in IEEE Xplore. One conference registration by the author can cover up to three papers which are authored or co-authored by the author. Researchers can submit their papers in different tracks such as Women in Engineering (WiE), Workshops, Early Research Forum, etc. The conference proceedings are indexed in SCOPUS and other major indexing platforms. IEEE ANTS 2023 will feature workshops, tutorials, and panel discussions, colocated with the main technical conference. Proposals to organize workshops, tutorials, and panel discussions in line with the theme and main conference are also encouraged. The early research forum will provide an opportunity for students and early career professionals to present and discuss their work in progress with experts and peers from around the world. Complimentary access to ANTS CAREER ZONE will be provided to all the participating individuals and sponsors. IEEE ANTS will present BEST PAPER AWARDS for each track during the conference. Several travel grants are available for conference attendees and authors. More details will be available soon. The authors of the selected (accepted) papers will be invited to submit the extended versions of the papers to the special issues of Springer Nature's journals, namely, Wireless Personal Communications and Photonic Network Communications.
